EXPO3D

Scientific directors: Davis Cussotto and Gabriele Boero

EXPO3D is an exhibition that showcases Italy's digital dental best practices, where dentists and dental technicians run live demonstrations on top-level treatments in restorative dentistry, implantology, and orthodontics. As per tradition, it takes place during the three days of the EXPODENTAL Meeting in the very heart of the exhibition center (Pavilion C2), where clinical cases are illustrated using software programs and devices (scanners, printers, milling machines...) provided by the exhibitors.
